Professional Experience

09/2021 – present
Remote

Freelancer Web Developer, Self-Employed

- Understanding client requirements, I work closely with clients to understand their goals and requirements.
- I create a plan for the website's structure and design. This involves creating wireframes or mockups of the website's layout and design elements to ensure it's user-friendly.
- Developing the website: Once the design is finalized, I begin coding the website for what fits the project requirements.
- I ensure that the website is responsive and optimized for search engines and that it meets web accessibility standards.
- manage my schedule and workload effectively, and be able to work independently without direct supervision.

09/2022 – 06/2023
Aleppo, Syria

Front-End Developer (React JS), Raizer

- Building responsive and interactive user interfaces using React JS.
- Collaborating with designers, developers, and other stakeholders to ensure the best possible user experience.
- Developing reusable and modular components for use across multiple projects.
- Conducting code reviews and providing constructive feedback to other developers.
- Staying up-to-date with emerging trends and best practices in Front-End development and React JS in particular.
- Participating in agile development processes, including daily standups, sprint planning, and retrospectives.

04/2022 – 07/2022
Aleppo, Syria

Frontend Developer Intern, Dragonfly-soft

- Integrating the front-end with the back-end built on Laravel.
- Work with various third-party libraries and plugins to implement features.

- This project was an excellent opportunity for me to develop my skills as a front-end developer using Vue.js Framework.
- Communicating with the whole team and joining the daily meetings using Slack.

Education

- 10/2019 – 10/2024 **Bachelor of Engineering / Mechatronics Engineering, Aleppo University**
- Developed a strong foundation in mechanical engineering, electronics, computer science, and control systems.
 - Acquired theoretical knowledge and practical skills in the design, analysis, and implementation of complex electro-mechanical systems.

Projects

AI Summraizer, React js [🔗](#)

Ai Summarizer is a web app for summarizing blogs from any link you give using Chat-GPT API.

- Developing the Web Application using React with managing the States and requests of the API with redux.
- using the new chatGPT API for handling the requests and summarizing the blogs that come from the user link.
- save all the results and cache them in the local storage so that the user could back to them later and not send the request again.

Web Scraping Application, Node js [🔗](#)

- Developed a web scraping project using Node.js to consolidate and apply the knowledge gained in Node.js.
- Utilized libraries such as Axios and Cheerio for fetching web pages and parsing HTML content.
- Implemented robust error handling and retry mechanisms to ensure reliable data extraction from various websites.
- Extract all the data convert and save it into a CSV file.

Job Finder web app, Vanilla JS [🔗](#)

Job Finder is a web app like (Forsa.sy) in which you can register as an employee or employer

- Experimenting with Building real web applications using Vanilla JS and SASS.
